Truth in Savings Disclosure

Account Definitions:

Savings, Money Market / Share Account:	This account is not a transaction account. Please see Account Disclosures for more information.
Checking / Share Draft Account:	This account is designed for transacting normal personal business.
Dividend:	Also known as the interest rate.
Dividend Rate:	The stated dividend rate before calculating the effect of compounding.
APY:	The annual percentage yield over one-year based on the dividend rate with compounding interest.
ADB:	The average daily balance.

Current Rates:

For a complete list of current rates on all of our share / deposit products, please go to our website under the rates page, e-mail a request to us at contact@fourpointsfcu.org, visit a Four Points location, or call us at 1-800-323-2786.

Account Terms:

INTEREST RATE: The rate of interest paid on all savings, all checking, and the High Yield Money Market account is determined each month at the sole discretion of the credit union Board of Directors or its designated appointees in policy. The rate of interest paid on the Prime Money Market account is calculated as Wall Street Prime – 3.75% on balances over \$20,000 and Wall Street Prime – 7.50% on balances less than \$20,000. Rates are updated on the 1st of the month following a change to Wall Street Prime. The minimum (floor) rate for the Prime Money Market account is .20%. The nominal (stated) rate and the corresponding annual percentage yield may change each month. There is no limit on the amount that the interest rate and APY may change.

MINIMUM BALANCE REQUIREMENT: Members must maintain a minimum balance in the primary savings account of \$5. A minimum balance of \$15,000 is required on the Prime Money Market Account; if the average daily balance falls below \$15,000, a monthly service charge of \$25.00 will apply. Interest is earned on the entire account balance.

COMPOUNDING: Interest is paid and compounded on the last day of each month for the monthly dividend period. Interest is calculated using the daily balance method. This calculation is made by averaging the ending daily balance of the account by the number of days in the dividend period and applying the nominal rate of interest paid for the period.

CREDITING: Accounts begin to accrue interest and receive credit from the day after deposit for both cash and noncash (check) deposits and receive interest credit through date of withdrawal.

NATURE OF DIVIDENDS: Dividend rates are declared during the month prior to the month in which they will be paid. Dividends are paid from current income and available retained earnings of the credit union after required transfers to reserves. The rate and APY are the prospective rates and yields anticipated for the dividend period.

CLOSED ACCOUNTS: An account must remain open on the date of dividend payment, which is the last day of each month, in order for interest to be applied. If an account is closed before the date of dividend payment, interest accrued may not be credited.

Account	Savings (All account types including IRA's and Youth)	Checking (All account types)	High Yield Money Market	Prime Money Market
Dividends Credited & Compounded	Monthly	Monthly	Monthly	Monthly
Minimum Balance	\$5.00	None	None	\$15,000
